

Orbit Digital — Proposal for Order Management System

Submitted to: Procurement Committee | **Date:** July 12, 2026

1. Executive Summary

This proposal responds to the RFP issued by a mid-size retail group seeking a cloud-based Order Management System (OMS) to consolidate order processing across e-commerce, in-store point-of-sale, and wholesale channels. The system must integrate with the client's existing SAP ERP and warehouse management system, provide real-time inventory visibility across channels, and support approximately 3x order-volume growth over the next 24 months without a re-platform. Orbit Digital brings over a decade of retail systems experience to this engagement. We have delivered order management, inventory, and fulfillment systems for a wide range of retail clients and are confident in our ability to deliver a system that meets the client's needs.

2. Proposed Solution & Implementation Approach

Orbit Digital will design and build a cloud-based OMS covering order capture, inventory visibility, and fulfillment across the client's channels. Our platform will integrate with the client's SAP environment and support the growth targets described in the RFP.

- Cloud-hosted OMS covering order capture, inventory, and fulfillment routing
- Integration with SAP ERP and the client's warehouse management system
- Designed to scale with the client's projected order growth
- Dashboards for operations and customer service teams

Our integration approach will be finalized collaboratively with the client's SAP and WMS teams during the project kickoff phase, drawing on our team's broad experience integrating with a variety of ERP and WMS platforms. Specific interface protocols (e.g. IDoc vs. OData for SAP, or the exact WMS API version) will be confirmed at that time based on the client's environment.

3. Timeline, Team Structure & Milestones

We estimate a 6-month engagement, with the exact schedule to be refined once integration specifics are confirmed during kickoff.

- Phase 1: Kickoff and requirements alignment
- Phase 2: Core platform build
- Phase 3: Integration and testing
- Phase 4: Go-live and stabilization

Team: Orbit Digital will assign a project team sized appropriately to the engagement, led by a Senior Engagement Manager with 15+ years in retail systems delivery. Specific team composition will be confirmed at contract signing based on final scope.

4. Pricing

Line Item	Detail	Price (USD)
Implementation	Estimated, 6-month engagement	\$310,000 (est.)
Integration Services	SAP + WMS integration	\$45,000 (est.)
Annual Platform License	Year 1	\$85,000 / yr
Support (Yr 2+)	Standard support tier	\$7,500 / mo

Assumptions: Figures marked (est.) are preliminary and subject to a detailed scoping exercise after contract award, which typically results in a final quote within 10-15% of the estimate. Total Year 1 cost: approximately \$440,000, pending final scope.

5. Security, Compliance & Risk Controls

- Hosted in a certified cloud environment meeting industry-standard security practices
- Encryption in transit and at rest for customer and order data
- Access controls aligned with the client's existing identity provider

Orbit Digital maintains a mature security program consistent with our decade of experience serving retail clients handling sensitive order and customer data. Detailed compliance documentation (certifications, audit reports, penetration test cadence) is maintained internally and can be provided during contract due diligence.

6. Support Model, Experience & References

Orbit Digital has delivered over 20 retail systems engagements in the past decade, including numerous order management and fulfillment projects for well-known regional and national retailers.

- Reference 1: National department store chain — enterprise fulfillment platform, live since 2019
- Reference 2: Regional grocery chain — inventory and order visibility platform, live since 2021
- Reference 3: Big-box home improvement retailer — multi-channel order routing, live since 2020
- Reference 4: Available on request
- Support: dedicated account team with standard business-hours coverage; premium 24/7 tier available
